1. My tutor...

^{1.8)} What aspects of this tutor's approach to teaching best helped your learning?

- Easy to understand
- Everything
- Explaining the equations when asked
- Going through each question in segments so it allowed us to try it ourselves - also good with time
- He helped answer individual questions
- Jasper is very patient when I ask him questions that I was confused with.
- Jasper was fun to have as a tutor and helped to explain the course material in a way that made sense; he was also very helpful with giving advice for studying, and was overall very friendly and approachable
- Just being there and teaching statistics.
- This tutor helped me a lot when I couldn't understand the codes.

1.9) What would you have liked this tutor to have done differently?

- Maybe went into deeper explanation with each question in an organised pace, sometimes it was a bit hard to catch up
- Nothing
- Nothing he's the absolute goat. (Maybe some more engaging questions but this is statistics so how engaging can it really be)
- not much to be honest; the only thing would be that sometimes his explanations of the solutions to the practice worksheets were a bit confusing however he did help explain them when i asked for further clarification so no complaints really
- Not sure
- The goat
